Subject: Post Office Square

The Health Department has received all the necessary plans for the wastewater system proposed at Post Office Square. We are working closely with their engineer to finalize those plans for approval. We have also received all the necessary documentation for the establishment of the condominium device that will detail the ownership of the wastewater system and the responsibilities for its maintenance and replacement. At this point we do not have any recommended conditions for the Board of Appeals and we anticipate resolving all issues within the confines of Title 5.
